

## Channel Shop

Sell your first channel on Magma and provide liquidity to an Amboss Sticker Store.

### Log in to [Amboss.Space](#)

Sign the provided message using your node, WebLN, or with an Account Email (requires prior setup).

### Enable Magma Notifications

1. Click on Account and go to the [Notifications section](#).
2. Connect Telegram (or Email)
3. Under Notifications, Enable **Magma Marketplace Events** by selecting Telegram or Email.

### Create an Offer on Magma

1. Navigate to [amboss.space/magma](#) and click “sell channels” to open an offer form.
2. Complete the form with the following details:
  - a. Total Size (sats)  $\geq 1,000,000$  (Don’t worry if you don’t have that many sats! Only 100k sats are needed for this exercise).
  - b. Min Size (sats) = 100,000
  - c. Max Size (sats) = You decide!
  - d. Variable Fee (ppm) = \_\_\_\_\_  
This is a fee based on the size of the channel, but this is also the “cost of liquidity”. To see the current market price for liquidity, go to the [LOOP page on Amboss](#) and find the Incoming Fee Distribution chart. Set a variable fee to match the tallest bar in LOOP’s incoming fee distribution. This is a good market price for liquidity.
  - e. Fixed Fee (sats) = \_\_\_\_\_  
This is a fee that can help you recover the cost of opening and closing a channel. To calculate a simple cost for this, let’s assume simple transactions with 1 input and 2 outputs: 141 bytes of data. Check the current mempool fees to find the sats/vbyte.
$$141 \text{ bytes} \times \frac{\text{sats}}{\text{vbyte}} \times 2 \text{ txns} =$$
  - f. Channel Duration = 1 week
  - g. Max Fee Rate (ppm) = You decide!
  - h. Max Base Fee (sats) = You decide!
3. Send your node pubkey or amboss link to @jestopher on Telegram or [info@amboss.tech](mailto:info@amboss.tech).

### Fulfill the Order Requested!

You should receive a notification that you received an order. If you open the channel as ordered, you’ll receive your first payment from Magma!
